

**Knightley & Sons**  
GARDEN DESIGN & MAINTENANCE

## Decking

After installation, avoid heavy furniture or sharp objects on the deck for at least 48 hours to let the fixings settle.

Clean the surface regularly with a soft brush and mild soapy water—avoid pressure washing, as it can damage the surface, especially on composite or timber.

For timber decks, apply a protective oil or sealant within 4–6 weeks of installation, and reapply every 12–18 months.

Keep the deck free of leaves, moss, and moisture to prevent slipping and staining—especially on anti-slip surfaces.

Check for loose boards or fixings periodically and tighten as needed.

Avoid walking on the deck with wet shoes or muddy boots to prevent scratches and stains.

To maintain anti-slip properties, clean the surface regularly and avoid using abrasive cleaners.

With proper care, your deck will remain safe, stylish, and enjoyable for years to come.
